### **Status Inquiry**

1. Applicant's status inquiry, filed May 23, 2005, is acknowledged. The application is currently pending in the Office. An office action requiring restriction to a single invention follows.

### **Restriction**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-10, drawn to a control method for a vehicle power system, classified in class 701, subclass 22.
  - II. Claims 11-20, drawn to an electrical distribution system for a vehicle, classified in class 180, subclass 65.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process may be practiced by hand or by a series of discrete circuits, and further the apparatus may be used to practice a process of operating a pure electric vehicle, or a dual power source stationary device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3618

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
